

# CUT'N'PASTE™

## Metsulfuron-methyl Weed Gel MetGel™

Important: Read front and back labels before use

NZ Owned & Made

Convenient and targeted for all  
types of WEEDS.

NO spray - paste AWAY your weeds.

Contents 450ml

*Directions:* MetGel should be applied either:

1. To the whole level surface of a shrub or tree stump IMMEDIATELY after cutting near to the ground. The gel will be drawn down into the roots system and prevent regrowth. Should there be any regrowth simply retreat. Great for Chinese privet, gorse and other hard to kill shrubs. Or:

2. Onto the underside of a couple of leaves of herbaceous weeds. Great for Agapanthus, Ginger, Arums and other hard to kill plants.

Metsulfuron, the active ingredient in MetGel may persist for some time in the soil and is known to travel through soil water affecting desirable plants downslope. It decomposes most quickly in acidic conditions.

Go to [www.cutnpaste.co.nz](http://www.cutnpaste.co.nz) for full instructions on use or email enquiries to [info@cutnpaste.co.nz](mailto:info@cutnpaste.co.nz)

### HANDLING, PRECAUTIONS AND EQUIPMENT CARE:

Use disposable nitrile gloves and overalls when applying MetGel. Work backwards through the weed infestation to avoid skin contact. Do not use during rainy periods to reduce the risk of runoff. In suitable conditions, the gel can dry quickly on stumps forming a seal. Clean paste from the brush with a paper towel after use. Refill containers from bulk supply in a secure area away from water courses. Empty containers can be triple rinsed and recycled. Rinse water may be used in spray tanks.

Do not apply on or around food and

croplands intended for humans or animals. Not to be used on or around waterways

**STORAGE:** Close the containers and store in a cool dark place away from foodstuffs, children and pets, seeds and fertilisers. Kept as recommended the product has a recommended shelf life of six months from the Date of Manufacture (DOM).

### ACTIVE INGREDIENT:

Metsulfuron-methyl CAS 74223-64-6  
EPA approval HSR100947

Hazard Rating 9.1A, 9.2A

### FIRST AID MEASURES:

Skin and clothes contact, remove contaminated clothing and wash affected areas of skin immediately. If gel is splashed in eyes, flush with running water for at least 15 minutes. Ingestion: The compound is not likely to be hazardous by ingestion. However seek Medical attention if necessary. For advice contact the National Poisons Centre 0800 POISON (0800 764766)
